

data/ Directory Guide

Persistence Layer & Runtime Database Store

1. Folder Purpose & Architectural Role

The **data/** directory holds all persistent production databases and JSON flat-file storage engines. All user reports, municipal proposals, voter tracking records, and SMS audit trails are saved here.

2. File Breakdown & Dependency Matrix

File / Subdirectory	Detailed Description & Architectural Role
• <code>civicpulse.db</code>	Primary SQLite database storing complaints, user credentials, resolution photos, SLA timestamps, and SMS notification audit logs.
• <code>civic_pulse_users.db</code>	Legacy/backup user database retained for data integrity and reference.
• <code>demands.json</code>	JSON flat-file store for citizen community demand proposals, upvotes, and cost estimates.
• <code>city_proposals.json</code>	JSON flat-file store for municipal CapEx infrastructure proposals submitted by city officials.
• <code>brics_incoming_requests.json</code>	JSON flat-file store for cross-border BRICS joint project collaboration requests.

3. Operational Notes & Usage Instructions

Managed by `backend/api_client.py`, `demands_engine.py`, and `brics_proposals_engine.py`.
