

scripts/ Directory Guide

Automated Test Suites & Development Utilities

1. Folder Purpose & Architectural Role

The **scripts/** directory contains standalone Python utility scripts used for automated unit testing, database inspection, and verification.

2. File Breakdown & Dependency Matrix

File / Subdirectory	Detailed Description & Architectural Role
• <code>test_verification.py</code>	Master integration test suite verifying backend route responses, portal page HTML rendering, and API contracts.
• <code>test_sms_gateway.py</code>	Unit test suite validating SMS notification logging and gateway dispatch logic.
• <code>inspect_db.py</code>	Quick terminal tool to inspect SQLite database tables, record counts, and schema definitions.

3. Operational Notes & Usage Instructions

Run manually via `python scripts/test_verification.py` during development and continuous integration.
