

static/ Directory Guide

Client-Side Pages, JavaScript Controllers, CSS & Uploads

1. Folder Purpose & Architectural Role

The **static/** directory contains all client-facing user interface assets served by the web server. It includes role-specific HTML views, modular JavaScript logic controllers, the enterprise CSS design system, and runtime user photo uploads.

2. File Breakdown & Dependency Matrix

File / Subdirectory	Detailed Description & Architectural Role
• <code>static/pages/login.html</code>	Sovereign Login Gateway featuring role selector cards and Sign In / Register mode tabs.
• <code>static/pages/citizen.html</code>	Citizen Portal dashboard with issue reporting modal, GPS map, community demands, and SLA tracker.
• <code>static/pages/city_official.html</code>	City Official Command Centre for complaint resolution, engineer dispatch, and AI MegaPlans.
• <code>static/pages/government.html</code>	Government Hub dashboard displaying national CapEx analytics and BRICS joint proposals.
• <code>static/pages/central_official.html</code>	Central Official portal for evaluating incoming cross-border project requests.
• <code>static/js/app.js</code>	Shared application bootstrap initializing AppState, icon registry, and UI toast modals.
• <code>static/js/i18n.js</code>	GNMT internationalization engine translating data-i18n elements into 20+ regional languages.
• <code>static/js/problem_map_table.js</code>	Universal Geospatial Leaflet command map and side-by-side data matrix controller.
• <code>static/js/citizen.js</code>	Citizen portal controller managing issue submission, GPS location, voice TTS, and demand voting.
• <code>static/js/city_official.js</code>	City official controller powering complaint resolution, photo proof uploads, and AI plan generation.
• <code>static/js/government.js</code>	Government Hub controller managing national metrics, budget alignment, and BRICS collaboration.
• <code>static/js/central_official.js</code>	Central official controller managing proposal evaluation and status actions.
• <code>static/css/styles.css</code>	Single unified enterprise dark-mode glassmorphism design system stylesheet.
• <code>static/uploads/</code>	Runtime upload directory storing citizen issue photos and municipal resolution proof photos.

3. Operational Notes & Usage Instructions

Mounted directly in Starlette via `Mount('/', StaticFiles(directory='static'))`.
